Historically, it was the first Economic Census in Cambodia as a complete count of all establishments.

Under the legal basis of the Statistics Law, the EC2011 aims at compiling basic statistics on establishments and enterprises in the whole Cambodia's territory. The final results provide information on the current situation of establishments in Cambodia and serve for various users such as policy makers, government officials at both national and local levels, international organizations, NGOs, private sectors, researchers, and development partners.

The final results will contribute to achieving the socio-economic development goals of the Royal Government in supporting evidence-based planning. I am sure that the public will be very much benefitted to use the EC2011 results to the full extent possible.

We express our deep sense of gratitude to the Royal Government of Cambodia led by **Samdech Akka Moha Sena Padei Techo HUN SEN**, Prime Minister of the Kingdom of Cambodia for his constant support to the statistical activities, especially to the EC2011 which enabled very successful completion of the census. Observing Table 1-3, it can be recognized that Kampong Cham as well as the whole Kingdom of Cambodia present more than 60% for “Home business”. The percentage for “Home business” was higher in Kampong Cham (67.8%) than in the Kingdom (64.7%). The percentage for “In apartment building” and “Occupying exclusively one block or one building” were also higher in Kampong Cham than in the Kingdom.

Table 1-4 depicts a different picture between the percentages of number of persons engaged and number of establishments due to the difference in size of persons engaged for each category of business place as depicted in Fig.1-7. In the establishments classified as “Street business”, “Home business”, “In traditional market” and “Others”, the percentages of number of persons engaged are smaller than those in number of establishments both in Kampong Cham and Cambodia. Meanwhile in the establishments classified into “In apartment building” and “Occupying exclusively one block or one building”, the percentages of those are larger both in Kampong Cham and Cambodia.

Particularly, comparing the percentages for “Occupying exclusively one block or one building” between number of establishments and number of persons engaged, the difference is very wide. This is due to the fact that establishments classified in this category include large-scaled establishments with a number of persons engaged normally. Computing the average number of persons engaged per establishment for “Occupying exclusively one block or one building”, it shows 26.8 persons for Cambodia, and 13.9 for Kampong Cham. See Annex Table 4-4.

1-3: Size of Establishment

The size of establishment can be measured by asset for operating the establishment, land area for business, and number of persons engaged, etc. In this section, the latter two indicators are treated.

<Size of Land Area of Business Place>

The size of land area of business place was enumerated in this Census. The size of land area of business place is regarded as size of working space of each establishment. It is grouped into the following classes:

- a) "Under 5 m²"
- b) "5m² - under 10m²"
- c) "10m² - under 30m²"
- d) "30m² - under 50m²"
- e) "50m² - under 100m²"
- f) "100m² - under 200m²"
- g) "200m² - under 500m²"
- h) "500m² - under 1,000m²"
- i) "1,000m² or more"

Comparing the percentage distribution of establishments by size class of land area of business place between Kampong Cham and Cambodia, it can be found that the proportion of establishments of “Under 5m²” and “5m² - under 10m²” is smaller in Kampong Cham than in Cambodia. On the other hand the proportion of the establishments with the intermediate sized land area which is a combination of 10m² to under 200m² is larger in Kampong Cham than in Cambodia, and the proportion of that with the large sized land area is nearly the same between them.

Fig.1-9 depicts the rate of occupancy by Kampong Cham in the number of establishments by size class of land area of business place among the twenty-four provinces. According to this figure, Kampong Cham occupies the highest portion with 13.8% in the class of “50m² - under 100m²”.

Meanwhile looking at the rate of occupancy by Kampong Cham in terms of persons engaged by size class of land area of business place among the twenty-four province, it shows the largest with 11.1% in the class of “30m² - under 50m²” as shown in Fig.1-10.

<Size of Number of Persons Engaged>

The size of number of persons engaged is the most important enumeration item not only in economic censuses but also in economy related surveys. The data cross-classified with other enumeration items are of wide use for policy formulation and program implementation, researches , marketing, etc. regarding employment, social security, social welfare, and so on.

In this report, for the convenience of statistical presentation, number of persons engaged is grouped into the following classes:

1 person, 2-4 persons, 5-9 persons, 10-19 persons, 20-49 persons, 50-99 persons,
100 persons or more.

Comparing the percentage distribution of establishments by size class of persons engaged between Kampong Cham and Cambodia in Table 1-5, the proportion of the class of 2-4 persons occupies the largest both in Kampong Cham (50.1%) and in Cambodia (48.2%).

Let us define the combination of the classes of 1 person and 2-4 persons as “small-sized class”, that of the classes of 5-9 persons, 10-19 persons and 20-49 persons as “intermediate-sized class” and that of the classes of 50 persons or more as “large-sized class”. The proportion of the small-sized class is 94.3% for Kampong Cham and 92.2% for Cambodia. The proportion of the intermediate-sized class shows 5.6% for Kampong Cham and 7.5% for Cambodia and that of the large-sized class presents only 0.1% for Kampong Cham and 0.3% for Cambodia.

In the same table, observing occupancy of Kampong Cham in number of establishments by size class of persons engaged, the concentration rate tends to decrease as the size of persons engaged becomes large, although some fluctuations are seen. It shows 11.2% for 1 person, 8.3% for 10-19 persons and 4.3% for 100 persons or more.

When looking at Table 1-6 showing the concentration rate for number and percentage of persons engaged by size class of number of persons engaged, similar patterns are observed as in Table 1-5.

1-4: Status of Establishment

<Type of Establishment>

The establishments can be classified into “Single unit”, “Head office” which holds branch office(s), and “Branch office” which is controlled by a head office at another location.

In the Kingdom of Cambodia, 505,134 establishments in total were classified into 386 head offices, 8,779 branch offices and 495,969 single units. Accordingly, head offices were 0.1% only, and branch offices were 1.7% and single units were 98.2% of the total establishments. In Kampong Cham, 56,263 establishments in total were classified into 5 head offices, 694 branch offices and 55,564 single units. As a result, head offices were 0.01%, and branch offices were 1.23% of the total establishments in Kampong Cham (Table 1-7).

The concentration rate was only 1.3% for “Head office”, and 11.2% for “Single unit”

<Tenure of Business Place>

According to Table 1-7, about 70% of the establishments were “Owned”, while a quarter of those were “Rented” in Cambodia. In Kampong Cham, 76% of the establishments were “Owned”, while 17% were “Rented” and 7% were “Others”.

The concentration ratio was 12.3% for “Owned”, and 7.9% for “Rented”.

<Ownership of Establishment>

In the Census, ownership of establishments is classified as follows:

- a) “Individual proprietor (with no registration)”
- b) “Sole proprietor (with registration)”
- c) “General partnership”
- d) “Limited partnership”
- e) “Private limited company”
- f) “Public limited company”
- g) “Subsidiary of a foreign company”
- h) “Branch of a foreign company”
- i) “Commercial representative office of a foreign company”
- j) “Cooperative”
- k) “State-owned organization (including autonomy-owned organization)”
- l) “NGO”
- m) “Others”

In the above classification of ownership, “Individual proprietor” refers to the proprietor, or own account worker not registered at the Ministry of Commerce or Provincial Department of Commerce, while “Sole proprietor” refers to the proprietor registered at the Ministry of Commerce or Provincial Department of Commerce.

In this report, for the convenience of statistical presentation, the categories of c) to j) are integrated to one group as presented in Table 1-8.

03 Kampong Cham	100.0	95.2	0.8	0.7	1.9	0.1	1.3

Observing Table 1-8, the percentage of establishments classified as “Individual proprietor” indicates 95.2% in Kampong Cham and 93.7% in Cambodia. The proportions of “Sole proprietor”, “Partnership, company and cooperative” and “NGO” are very small in number, and are smaller in Kampong Cham than in the Kingdom. On the other hand, those of “Individual proprietor”, “State-owned organization” and “Others” are larger in Kampong Cham than in the Kingdom.

Occupancy of Kampong Cham ranges from 3.6% to 13.5%, and is the smallest in “Sole proprietor” showing 3.6% in concentration rate. On the other hand, it is very high in “Others” recording 13.5% and in “State-owned organization” presenting 11.6%.

<Year of Starting the Business>

The year of starting the business, or the year when the establishment commenced its activities, is one of the enumeration items in the Census. In this report, for the convenience of analysis, it is classified into the following categories:

- (a) Prior to 1990
- (b) 1990-1999
- (c) 2000-2004
- (d) 2005-2009
- (e) 2010 or after.

1) Excludes “unknown” for percentages

According to Table 1-9, it is known that about 65% of the establishments started their activities in or after 2005 in Kampong Cham as well as in the Kingdom. Particularly, Kampong Cham indicated 23.8% against 24.0% for Cambodia for the period of 2010 or after. This suggests that the tendency of recent increase in new establishments was a little weaker in Kampong Cham than in other provinces in total. The finding that the concentration rate for Kampong Cham recorded a slightly downward trend since 11.8% of the period prior to 1990 to 11.0% for 2010 or after supports the suggestion described above.

<Attributes of Representative and Owner of Establishment >

Observing the female representative's proportion in Table 1-10, it is found the number of establishments represented by females is greater than that represented by males. The proportion of the establishments represented by female shows 65.1% for Cambodia and 61.8% for Kampong Cham. The proportion for Kampong Cham is lower than that for the Kingdom.

In this Census, the question whether the establishment is registered or not at the Ministry of Commerce or Provincial Department of Commerce was asked. The results disclosed that 3.4% of the establishments were registered in the Kingdom, while in Kampong Cham only 1.7% was registered.

The number of establishments with foreign owners amounts to 5,637 for the national total, while that is 186 establishments for Kampong Cham. The percentage of establishments with foreign owner is 1.1% for national total, and 0.3% only for Kampong Cham.

1-5: Status of Persons Engaged

The number of the persons engaged in the activities of establishments is compatible to the number of workers or employed persons, which is called as labor force too. In this respect, the status of persons engaged to be explored through the data derived from the Economic Census should be analyzed fully in various aspects. However, here, only topics related to demographic aspects are treated.

<Sex Balance of Persons Engaged between the Representatives by Sex >

The sex ratio is measured by number of males per 100 females. In the 2011 Economic Census, the persons engaged and the representatives were enumerated by sex. The sex ratio of the persons engaged was 63 males per 100 females for Cambodia and 81 males per 100 females for Kampong Cham.

Looking at Fig.1-11, the sex ratio for establishments with male representatives for the whole country is 104 males per 100 females, lower than for Kampong Cham, which is 160 males per 100 females. However, surprisingly, the sex ratio for establishments with female representatives is very small: 30 for the whole country and 32 for Kampong Cham.

Looking at Table 1-11, it is inferred that males tend to be much more employed by the establishments with male representative than by those with female representative, while females engaged tend to be more employed by the establishments with female representative than by those with male representatives for the national total and for Kampong Cham.

<Relative Change in Number of Persons Engaged by Year of Starting the Business>

Table 1-12 presents the proportion of number of establishments and that of persons engaged by period when the establishment commenced its activities. According to this table, it is recognized that the proportions of number of establishments and of persons engaged by period present the largest for the period of 2005-2009 about 40% not only for the Kingdom but also for Kampong Cham. Also, the older the period, the smaller the proportion is for Kampong Cham as well as for Cambodia. Here, considering that the period of 1990-1999 is ten years and that of 2010 or after is merely one year and three months, it may be said that relative proportions of number of

establishments and of persons engaged for the more recent period become smaller.

Table 1-12: Percentages of Number of Establishments and of Number of Persons Engaged by Year of Starting the Business

1) Excludes "unknown".

The average number of persons engaged per establishment may be useful for measuring substantive expansion of employment, avoiding the misunderstanding caused by the difference of length of years.

Fig.1-12 depicts the average number of persons engaged per establishment by year of starting the business. Observing the figure, it is known that the average number of persons engaged per establishment decreases from the beginning period for Cambodia and for Kampong Cham. The numbers are remarkably smaller for Kampong Cham than for Cambodia for most periods. Particularly, for the period of 1990-1999 the average number of persons engaged per establishment recorded 3.2 persons for Kampong Cham against 4.5 persons for the national value.

1-6: Industrial Structure

The most prime purpose of an economic census is to disclose the whole picture of the industrial structure for each of provinces, districts, communes and other various types of regions as well as for the country. By using the data presented by industrial classification, the industrial structure on establishments, enterprises, persons engaged, sales, expenses, profits, etc. can be disclosed. In the 2011 Economic Census, the industrial structure on establishments and of persons engaged for provinces, districts and communes are presented according to the sections of the International Standard Industrial Classification (ISIC), excluding the sections of “A”, “O”, “T” and “U”. It will be very helpful to use the data derived from the Census for drawing crude pictures of the industrial structures.

<Industrial Structure on Establishments>

Observing Table 1-13 and Fig.1-13 presenting the industrial structure on establishments for Cambodia and for Kampong Cham, it is found that “G. Wholesale and retail trade; etc.”, “C. Manufacturing”, “I. Accommodation and food service activities” and “S. Other service activities” indicate in this order greater proportions among 17 sections of industry in Cambodia, while in Kampong Cham the second position of the four major sections for the Kingdom is replaced by “I. Accommodation and food service activities”, and followed by “C. Manufacturing”.

LQ which is the abbreviation of “location quotient” is the measure indicating the extent of feature of each section of industry. The location quotients for Kampong Cham presented in Table 1-13 and Table 1-14 were obtained by dividing the proportion of a certain section of industry for Kampong Cham by that for Cambodia. When the result is larger than 1.0, the section of industry is regarded as having a significant feature. Otherwise, it is regarded as insignificant. It cannot be seen any distinguishing industry for Kampong Cham in terms of number of establishments.

1) LQ is not shown if numerators or denominators are less than 1%.

2) Figures may not be equal to calculation results based on figures in the table because percentages are rounded to one decimal place.

<Industrial Structure on Persons Engaged>

Table 1-14 and Fig.1-14 depict a different picture of the percentage of the number of persons engaged from that of the percentage of the number of establishments. The proportion of “G. Wholesale and retail trade; etc.” shrinks to 33.1%, and that of “C. Manufacturing” increases to 31.7% in Cambodia, though the order does not change. “P. Education” appears in the fourth position after “I. Accommodation and food service activities”, followed by “S. Other service activities”. This tendency is similar in Kampong Cham, and the proportion of “G. Wholesale and retail trade; etc.” keeps the first position with 42.1%, and “C. Manufacturing” inflates to 24.9% though it is still keeps the second position. Those of “I. Accommodation and food service activities”, “P. Education” and “S. Other service activities” follow in this order. Accordingly, these five sections can be said as major sections of industry in Kampong Cham.

Observing the location quotients for Kampong Cham in Table 1-14, “G. wholesale and retail trade; etc.” is high showing 1.3.

<Year of Starting the Business>

As described in Chapter 1, according to Table 1-9, it is known that about 65.0% of the establishments started their activities in or after 2005 in Kampong Cham as well as in the Kingdom. Observing the upper part of Table 2-7, it is recognized that within Kampong Cham “0305 Krong Kampong Cham”, “0308 Kaoh Soutin”, “0309 Krouch Chhmar” and “0314 Srei Santhor” showed relatively low values from 48% to 57%. On the other hand, “0304 Dambae” located in the outskirts of Kampong Cham recorded 83.5% which was the highest.

In addition, as described in Chapter 1, Kampong Cham indicated 23.8% against 24.0% for Cambodia for the period of 2010 or after. This suggests that the tendency of recent decrease in new establishments was a little weaker in Kampong Cham than in other provinces in total.

Within Kampong Cham, for the period of 2010 or after, the district showing the greatest percentage of 30.4% was “0310 Memot” located in the east of Kampong Cham. Following this, “0315 Stueng Trang” and “0304 Dambae” indicated about 29%. On the other hand, the district showing the smallest of 12.1% was “0308 Kaoh Soutin”.

However, observing the lower part of Table 2-7 showing the percentage of number of persons engaged, rather different picture from that of establishments is drawn. Particularly, it is recognized that the percentages of number of persons engaged are smaller than those of establishments for each district for the period of 2010 or after.

2-5: Status of Persons Engaged

<Sex Balance of Persons Engaged between the Representatives by Sex>

As described in Chapter 1, the sex ratio is measured by number of males per 100 females. The sex ratio of the persons engaged showed 63 males per 100 females for Cambodia and 81 males per 100 females for Kampong Cham. Accordingly, male workers are less than female workers for Kampong Cham and for Cambodia.

Looking at Fig.2-8, within Kampong Cham, most of the districts present sex ratios of persons engaged below 100. Among the seventeen districts, the districts located in the central core area show smaller sex ratios than the districts located in the outskirts of Kampong Cham.

On the other hand, observing the sex ratio of persons engaged by sex of representatives, it is recognized that the sex ratio for female representatives is extremely low from 21 for “0317 Krong Suong” to 48 for “0304 Dambae”. The sex ratios of person engaged for male representatives is mostly larger than 100 and varies widely from 46 for “0306 Kampong Siem” to 268 for “0302 Chamkar Leu”.

2-6: Industrial Structure

As described in Section 1-6 of Chapter 1, the most important purpose of an economic census is to disclose the whole picture of the industrial structure for each of provinces, districts, communes and other various types of regions as well as for the country. By industrial classification, the industrial structure on establishments, enterprises, persons engaged, sales, expenses, profits, etc. can be disclosed. In the 2011 Economic Census, the industrial structure on establishments and of persons engaged for provinces, districts and communes are presented according to the sections of the International Standard Industrial Classification (ISIC), excluding the sections of “A”, “O”, “T” and “U”. In order to draw the whole picture of industrial structure, it is needless to say that those activities excluded in the 2011 Economic Census should be included. Even so, it will be very helpful to use the data derived from the Census for drawing crude pictures of the industrial structures of provinces, districts and communes as well as the Kingdom.

<Industrial Structure on Establishments>

Observing Fig.2-10 or Annex Table D7-2 presenting the industrial structure on establishments for each district of Kampong Cham, it is found that in almost all districts “G. Wholesale and retail trade; etc.”, “I. Accommodation and food service activities”, “C. Manufacturing” and “S. Other service activities” indicate great proportions among the seventeen sections of industrial classification and constitute major sections of the industry. Among the major sections, “G. Wholesale and retail trade; etc.” occupies more than half of the total number of establishment in almost all districts of Kampong Cham. Among the seventeen districts, “0305 Krong Kampong Cham” marked the highest position with 67.3%, while “0308 Kaoh Soutin” was the only one exception showing 35.6%, less than half.

Following this industrial section, “I. Accommodation and food service activities” and “C. Manufacturing” occupied the second or third position among the industrial sections for all of the districts excluding “0305 Krong Kampong Cham” in which “S. Other service activities” became the third rank and “0308 Kaoh Soutin” in which “C. Manufacturing” occupied the first rank. For “I. Accommodation and food service activities”, “0306 Kampong Siem” recorded the highest rank of 19.0%, while “0304 Dambae” showed the lowest position with 6.9%. The percentage for “C. Manufacturing” presenting the third position for Kampong Cham” displayed a different picture among the seventeen districts. Most of the districts located in the outer fringe of Kampong Cham recorded higher percentages than those in the central part of Kampong Cham. The highest of 38.6% was marked by “0308 Kaoh Soutin” located in the former area, while the lowest of

5.5% was shown by “0305 Krong Kampong Cham” in the latter area.

The percentage for “S. Other service activities” showing 6.3% for Kampong Cham recorded the highest for “0309 Krouch Chhmar” and “0306 Kampong Siem” with 8.5%, while the lowest was marked by “0301 Batheay”, “0304 Dambae” and “0317 Krong Suong” with around 5.0%.

<Industrial Structure on Persons Engaged>

On the other hand, the picture of the industrial structures on persons engaged for the seventeen districts within Kampong Cham present a rather different pattern as shown in Fig.2-11 or Annex Table D7-4. Among the seventeen sections of industry, “G. Wholesale & retail trade; etc.” shrinks, but still keep the top position ranging from 24% to 57% among almost all the 17 districts.

“C. Manufacturing becomes larger occupying the 2nd rank in Kampong Cham showing 24.9%. Within Kampong Cham, “0306 Kampong Siem” showing 47.8% indicated the first rank, while “0301 Batheay” presenting 10.3% marked the lowest position.

The percentage for “I. Accommodation & food service activities” showing the 3rd position in almost all the districts ranges from 6.3% for “0304 Dambae” to 14.8% for “0505 Krong Kampong Cham”.

<Industrial Structure on Annual Sales>

Fig.2-12 and Annex Table D-16-3 depict the percentage distribution of the amount of annual sales by industry. It shows a different picture to that of the persons engaged. “K. Financial and insurance” appears on the 4th position in Kampong Cham. Within the Province “0310 Memot” is by far the largest with 11.9% being followed by “0317 Krong Suong” with 6.2%.

“P. Education” occupying the third or fourth position in the number of persons engaged is replaced with “K. Financial and insurance” or “S. Other service activities” in most of the districts.
