## FOREWORD

It is our great pleasure to officially release the final results of the 2011 Economic Census of Cambodia (EC2011) which was conducted from 1 to 31 March 2011 with 1 March 2011 as the reference date, covering the entire territory of the Kingdom of Cambodia. Historically, it was the first Economic Census in Cambodia as a complete count of all establishments.

Under the legal basis of the Statistics Law, the EC2011 aims at compiling basic statistics on establishments and enterprises in the whole Cambodia's territory. The final results provide information on the current situation of establishments in Cambodia and serve for various users such as policy makers, government officials at both national and local levels, international organizations, NGOs, private sectors, researchers, and development partners.

The final results will contribute to achieving the socio-economic development goals of the Royal Government in supporting evidence-based planning. I am sure that the public will be very much benefitted to use the EC2011 results to the full extent possible.

We express our deep sense of gratitude to the Royal Government of Cambodia led by **Samdech Akka Moha Sena Padei Techo HUN SEN**, Prime Minister of the Kingdom of Cambodia for his constant support to the statistical activities, especially to the EC2011 which enabled very successful completion of the census. Our thanks are due to the Ministry of Planning (MOP), the National Institute of Statistics (NIS) and line ministries such as the Ministry of Economy and Finance, the Ministry of Industry, Mines and Energy, the Ministry of Commerce, the Ministry of Interior and other relevant government ministries and institutions which facilitated our activities and led to the success of the EC2011.

We thank Governors of Phnom Penh Capital, provinces, and chiefs of districts as well as Chiefs of commune and village, who provided administrative facilitation for the implementation of the EC2011.

The EC2011 was one of the greatest statistical exercises, and its successful completion was possible with the total help and cooperation received from one and all. The major share of the credit for the success of the EC2011 should go to the entrepreneurs of small, medium and large enterprises who paid busy and valuable time of their daily business to provide information to the EC2011 Forms.

Deep thanks are also given to enumerators, supervisors, and the staff of the NIS and the MOP who were devoted, hard working, and loyal. H.E. According to the results of the 2011 Economic Census, the total number of establishments of Prey Veng indicated 29,933, while the total number of persons engaged counted 64,335 persons. It accounts for 5.9 % of the total number of establishments (505,134 establishments) and for 3.8 % of the total number of persons engaged (1,673,390) in the Kingdom of Cambodia. This means that Prey Veng's share of persons engaged which may contribute directly to the production of goods and services is considerably smaller than that of its population. In other words, it can be said that the degree of concentration on the province is smaller in the bases of economic activities than in the population.

Furthermore, the results of the 2011 Economic Census disclosed that the total amount of annual sales in Prey Veng presented 324 million US dollars, while that of annual expenses in the province indicated 259 million US dollars. The former accounted for 2.6 % of the total amount of annual sales, while the latter for 2.4 % of the total amount of annual expenses in the Kingdom. Roughly speaking, in Prey Veng the population occupying about 7.1 % of the national population produced the economic outputs of about 2.6 % of the national economy covered in the Economic Census.

#### <Relative Scale of each Province>

Economic scale can be measured by number of establishments and number of persons engaged as well as by amounts of annual sales, annual expenses and annual profit. According to the 2011 Economic Census results, as described previously, annual sales in Prey Veng recorded 324 million US dollars, and annual expenses remarked 259 million US dollars. Prey Veng indicated the seventh rank in annual sales and the eighth rank in annual expenses among the twenty-four provinces being followed by Kampong Speu province with annual sales of 312 million US dollars and followed by Takeo province with annual expenses of 230 million US dollars.

Also, Prey Veng ranks at the seventh position in the number of establishments presenting 29,933 and ranks at the ninth position in the number of persons engaged showing 64,335 among the twenty-four provinces being followed by Kampong Speu Province with 22,541 establishments and by Kampong Chhnang province with 57,575 persons engaged.

Table 1-2 presents the percentages of total number of establishments, total number of persons engaged, total amount of annual sales, and total amount of annual expenses for the Kingdom of Cambodia by province. The each percentage is sometimes called as “concentration rate” within the Kingdom of Cambodia. Indicators of Prey Veng constituted one of the five peaks excluding Phnom Penh in the scale of concentration rate as in the Fig. 1-6.

Observing Table 1-3, it can be recognized that Prey Veng as well as the whole Kingdom of Cambodia present more than 60 % for the establishments of “Home business”. More precisely, the percentage for the establishments was higher in Prey Veng (75.3%) than in the Kingdom (64.7%). On the contrary, the percentages for “Street business”, “In apartment building”, and “In traditional market” were lower in Prey Veng than in the Kingdom.

Furthermore, Table 1-4 depicts a different picture between the percentage of number of persons engaged and the percentage of number of establishments due to the difference in size of persons

engaged as for each category of business place as depicted in Fig.1-7. In the establishments classified as “Street business”, “Home business”, “In traditional market” and “Others”, the percentages of number of persons engaged show smaller than those in number of establishments both in Prey Veng and Cambodia. Meanwhile in the establishments classified into “In apartment building” and “Occupying exclusively one block or one building”, the percentages of those present larger both in Prey Veng and Cambodia.

Particularly, comparing the percentages for “Occupying exclusively one block or one building” between number of establishments and number of persons engaged, it is noticed the difference between those is very wide. This is due to the fact that the establishments classified as this category include large-scaled establishments with a number of persons engaged normally. Computing average number of persons engaged per establishment, it shows 26.8 persons for Cambodia and 7.4 persons for Prey Veng. See Annex Table 4-4.

### 1-3: Size of Establishment

The size of establishment can be measured by asset for operating the establishment, land area for business, and number of persons engaged, etc. In this section, the latter two indicators are treated.

#### <Size of Land Area of Business Place>

The size of land area of business place was enumerated in this Census. The size of land area of business place is regarded as size of working space of each establishment. It is classified into the following categories:

- a) "Under 5m<sup>2</sup>"
- b) "5m<sup>2</sup> - under 10m<sup>2</sup>"
- c) "10m<sup>2</sup>- under 30m<sup>2</sup>"
- d) "30m<sup>2</sup>- under 50m<sup>2</sup>"
- e) "50m<sup>2</sup>- under 100m<sup>2</sup>"
- f) "100m<sup>2</sup>- under 200m<sup>2</sup>"
- g) "200m<sup>2</sup>- under 500m<sup>2</sup>"
- h) "500m<sup>2</sup>- under 1,000m<sup>2</sup>"
- i) "1,000m<sup>2</sup> or more"

Comparing the percentage distribution of establishments by size class of land area of business place between Prey Veng and Cambodia, the proportions of establishments with "5m<sup>2</sup> - under 10m<sup>2</sup>", "30m<sup>2</sup> - under 50m<sup>2</sup>", and "1,000m<sup>2</sup> or more" are greater in Prey Veng than in Cambodia, while all of the other classes are smaller in Prey Veng than in Cambodia.

Fig.1-9 depicts the rate of occupancy by Prey Veng in the number of establishments by size class of land area of business place among the twenty-four provinces. According to this figure, Prey Veng occupies 7.8 % in the class of “1,000m<sup>2</sup> or more”.

Fig.1-10 shows the rate of occupancy by Prey Veng in the number of persons engaged by size class of land area of business place among the twenty-four provinces. Based upon the figure, it shows a very different picture from that of Fig.1-9. Prey Veng shows the largest with 7.0 % in the class of “5m<sup>2</sup> - under 10m<sup>2</sup>” while the size class of “1,000m<sup>2</sup> or more” is only 1.8 %.

### <Size of Number of Persons Engaged>

The size of number of persons engaged is the most important enumeration item in not only economic censuses but also in economy related surveys. The data cross-classified with other enumeration items are of wide use for policy formulation and program implementation, researches , marketing, etc. regarding employment, social security, social welfare, and so on.

In this report, for the convenience of statistical presentation, number of persons engaged is grouped into the following classes:

1 person, 2-4 persons, 5-9 persons, 10-19 persons, 20-49 persons, 50-99 persons, 100 persons or more

Comparing the percentage distribution of establishments by size class of persons engaged between Prey Veng and Cambodia, most of the proportions of establishments excluding for 2-4 persons are smaller in Prey Veng than in Cambodia as shown in Table 1-5.

Let us define the classes of 1 person and 2-4 persons as “small-sized class”, that of the classes of 5-9 persons, 10-19 persons and 20-49 persons as “intermediate-sized class” and that of the classes of 50 persons or more as “large-sized class”. The proportion of the small-sized class indicates a very large percentage for Cambodia (92.2%) as well as for Prey Veng (95.2%). The proportion of the intermediate-sized class shows 7.5% for Cambodia and 4.8 % for Prey Veng, and that of the large-sized class presents only 0.4% for Cambodia and only 0.1% for Prey Veng (Table 1-5).

In the same table, observing the occupancy of Prey Veng in terms of number of establishments by size class of persons engaged, the concentration rate tends to decrease according to the size of

persons engaged, although some fluctuations are seen. It shows 5.8% for the establishments with 1 person, 3.7 % for 10-19 persons and 0.9% for 100 persons or more.

## 1-4: Status of Establishment

### <Type of Establishment>

The establishments can be classified into “Single unit”, “Head office” which holds branch office(s), and “Branch office” which is controlled by a head office at another location.

In the Kingdom of Cambodia, 505,134 establishments in total were classified into 386 head offices, 8,779 branch offices and 495,969 single units. Accordingly, the head offices were 0.1% only, the branch offices were 1.7% and single units were 98.2% of the total establishments. Meanwhile, in Prey Veng, 29,933 establishments in total were classified into no head office, 277 branch offices and 29,656 single units. As a result, branch offices were 0.9% and single units were 99.1% of the total establishments (Table 1-7).

### <Tenure of Business Place>

According to Table 1-7, in this country about 70% of the establishments were “Owned”, while a quarter of those were “Rented” and 7% were “Others”. In Prey Veng, 83.9% of the establishments were “Owned”, while 7.9% were “Rented” and 8.2% were “Others”.

## <Ownership of Establishment>

In the Census, ownership of establishments is classified as follows:

- a) “Individual proprietor (with no registration)”
- b) “Sole proprietor (with registration)”
- c) “General partnership”
- d) “Limited partnership”
- e) “Private limited company”
- f) “Public limited company”
- g) “Subsidiary of a foreign company”
- h) “Branch of a foreign company”
- i) “Commercial representative office of a foreign company”
- j) “Cooperative”
- k) “State-owned organization (including autonomy-owned organization)”
- l) “NGO”
- m) “Others”

In the above classification of ownership, “Individual proprietor” refers to the proprietor, or own account worker not registered at the Ministry of Commerce nor Provincial Department of Commerce, while, “Sole proprietor” refers to the proprietor registered at the Ministry of Commerce or Provincial Department of Commerce.

However, in this report, for the convenience of statistical presentation, the categories of (c) to (j) are integrated to one group as presented in Table 1-8.

The proportion of “State-owned organization” and “Others”, those which are very small in number, are larger in Prey Veng than in the Kingdom. On the other hand, those of “Sole proprietor”, “Partnership, company and cooperative” and “NGO” are smaller in Prey Veng than in the Kingdom.

#### <Year of Starting the Business>

The year of starting the business, or the year when the establishment commenced its activities, is one of the enumeration items in the Census. In this report, for the convenience of analysis, it is classified into the following categories:

- (a) Prior to 1990
- (b) 1990-1999
- (c) 2000-2004
- (d) 2005-2009
- (e) 2010 or after

1) Excludes “unknown” for percentages.

According to Table 1-9, it is known that 62% of the establishments started their activities in or after 2005 in Prey Veng as well as about 66% in the Kingdom. Prey Veng indicated 23.3% against 24.0% for Cambodia for the period of 2010 or after. This suggests that the tendency of recent increase in new establishments was not so stronger in Prey Veng than in the Kingdom.

## <Attributes of Representative and Owner of Establishment >

Observing the female representative's proportion, it is found that the number of establishments represented by females is greater than that represented by males. The proportion of the establishments represented by female shows 65.1% for Cambodia and 61.7% for Prey Veng. The proportion for Prey Veng is less than that for the Kingdom.

In this Census, the question whether the establishment is registered or not at the Ministry of Commerce or Provincial Department of Commerce was asked. The results disclosed that only 3.4% of the establishments were registered in the Kingdom while in Prey Veng, only 1.1% of establishments were registered. The number of the establishments with foreign owners amounts to 5,637 for national total, while that is 461 establishments for Prey Veng. The percentage of total establishments with foreign owners is 1.1% only for national total and 1.5 % for Prey Veng. See Annex Table 10-3.

## 1-5: Status of Persons Engaged

The number of the persons engaged in the activities of establishments is compatible to the number of workers or employed persons, those which is called as labor force too. In this respect, the status of persons engaged to be explored through the data derived from the Economic Census

should be analyzed fully in various aspects. However, here, only topics related to demographic aspects are treated.

### <Sex Balance of Persons Engaged between the Representatives by Sex >

The sex ratio is measured by number of males per 100 females. In the 2011 Economic Census, the persons engaged and the representatives of establishments were enumerated by sex. The sex ratio of the persons engaged 63 for Cambodia and 87 for Prey Veng.

Looking at Fig. 1-11 the sex ratio of persons engaged under male representatives for Prey Veng is 215, larger than that for Cambodia of 104. However, surprisingly the sex ratio of persons engaged under female representatives is very small: 30 for the Kingdom and 34 for Prey Veng province.

Looking at Table 1-11, it is inferred that males engaged tend to be much more employed by the establishments with male representatives than by those with female representatives, while females engaged tend to be more employed by the establishments with female representatives than by the establishments with male representatives for the national total and for Prey Veng.

### <Relative Change in Number of Persons Engaged by Year of Starting the Business>

Table 1-12 presents the proportions of number of establishments and that of persons engaged by period when the establishment commenced its activities. According to this table, it is recognized that the proportions of number of establishments and that of persons engaged by period present the largest for the period of 2005-2009 for the Kingdom but also for Prey Veng. Also, the older the period, the smaller the proportion is for Prey Veng as well as for Cambodia.

Here, considering that the period of 1990-1999 is for ten years and that of 2010 or after is for only about one year, it may be said that relative proportions of number of establishments and that of persons engaged for the more recent period become larger.

1) Excludes "unknown".

The average number of persons engaged per establishment may be useful for measuring substantive expansion of employment avoiding the misunderstanding caused by the difference of length of years for the periods.

Fig.1-12 depicts the average number of persons engaged per establishment by the period of starting the business. Observing the figure, it is known that the average number of persons engaged per establishment has decreased since the beginning period for Prey Veng as well as for Cambodia. However, for Prey Veng it presents remarkably lower than for Cambodia for each period. Particularly, for the period of 1990-1999 the average number of persons engaged per establishment recorded 2.2 persons which was less than half of the national value (4.5 persons) due to decrease in labour demand for reconstruction of Prey Veng city after the end of inner war.

## **1-6: Industrial Structure**

The prime purpose of an economic census is to disclose the whole picture of the industrial structure for each of provinces, districts, communes and other various types of regions as well as for the country. By using the data presented by industrial classification, the industrial structures on establishments, enterprises, persons engaged, sales, expenses, profits, etc. can be disclosed. In the 2011 Economic Census, the industrial structures on establishments and of persons engaged for provinces, districts and communes are presented in the section of the International Standard Industrial Classification (ISIC) excluding the sections of “A”, “O”, “T” and “U”. Even so, it will be very helpful to use the data derived from the Census for drawing crude pictures of the industrial structures.

### **<Industrial Structure on Establishment>**

Observing Table 1-13 and Fig.1-13 presenting the industrial structures of establishments for Cambodia and for Prey Veng, it is found that “G. Wholesale and retail trade; etc.”, “C. Manufacturing”, “I. Accommodation and food service activities”, and “S. Other service activities” indicate in this order greater proportions among the seventeen sections of industries in Prey Veng as well as in Cambodia.

LQ which is the abbreviation of “location quotient” is the measure indicating the extent of feature of each section of industry. The location quotients for Prey Veng presented in Table 1-13, Table 1-14, and Table 1-15 were obtained by dividing the proportion of a certain section of industry for Prey Veng by that for Cambodia. When the result is larger than 1.0, the section of industry is regarded as having a significant feature. Otherwise, it is regarded as insignificant. It shows 1.9 for the section of “N. Administrative and support service activities” in Prey Veng.

### <Industrial Structure on Persons Engaged>

Table 1-14 and Fig.1-14 depict a different picture in the percentage of the number of persons engaged from that of the number of establishments. The proportion of “G. Wholesale and retail trade; etc.” shrinks to 33.1% and that of “C. Manufacturing” increases to 31.7% in Cambodia, though the order does not change. “P. Education” appears in the fourth position after “I. Accommodation and food service activities”, and “S. Other service activities” follows.

In Prey Veng, this tendency is similar. “G Wholesale and retail trade” shrinks to 48.4% and “C Manufacturing” increases to 15.9%, though the order does not change. “P. Education” and “I. Accommodation and food service activities” follow in this order. Accordingly, these four industries can be said as major industries in Prey Veng in terms of number of persons engaged.

## 2-5: Status of Persons Engaged

### <Sex Balance of Persons Engaged between the Representatives by Sex >

As described in Chapter 1, the sex ratio is measured by number of males per 100 females. The sex ratio of the persons engaged showed 63 males per 100 females for Cambodia and 87 males per 100 females for Prey Veng. Accordingly, male workers of establishments are less than female workers for Prey Veng as well as for Cambodia.

Looking at Fig.2-8, within Prey Veng all of the thirteen districts present the sex ratio of persons engaged below 100 except “1403 Kampong Trabaek”. Those twelve districts present the sex ratio of persons engaged above 60.

Meanwhile, the sex ratio of the representatives of establishments ranges from 31 for “1410 Krong Prey Veng” to 105 for “1409 Preah Sdach”.

On the other hand, observing the sex ratio of persons engaged by sex of representatives of establishments in Fig.2-9, it is recognized that the sex ratio for female representatives indicates extremely low from 23 for “1410 Krong Prey Veng” to 46 for “1413 Svay Antor”, while the sex ratio for male representatives indicates higher values ranging from 140 for “1413 Svay Antor” to

267 for “1403 Kampong Trabaek”.

## 2-6: Industrial Structure

As described in Section 1-6 of Chapter 1, the most important purpose of an economic census is to disclose the whole picture of the industrial structure for each of provinces, districts, communes and other various types of regions as well as for the country. By industrial classification, the industrial structures on establishments, enterprises, persons engaged, sales, expenses, profits, etc. can be disclosed. In the 2011 Economic Census, the industrial structures on establishments and on persons engaged for provinces, districts and communes are presented according to the sections of the International Standard Industrial Classification (ISIC) excluding the sections of “A”, “O”, “T” and “U”. In order to draw the whole picture of industrial structure, it is needless to say that those activities excluded in the 2011 Economic Census should be included. Even so, it will be very helpful to use the data derived from the Census for drawing crude pictures of the industrial structures of provinces, districts and communes as well as the Kingdom.

### <Industrial Structure on Establishment>

Observing Fig. 2-10, or Annex Table D7-2 presenting the industrial structure on establishments for each district of Prey Veng, it is found that “G. Wholesale and retail trade; etc.”, “C. Manufacturing”, “I. Accommodation and food service activities”, and “S. Other service

activities” indicated greater proportions among the seventeen sections of industrial classification and constituted major sections of the industries. Among the major sections, “G. Wholesale and retail trade; etc.” occupied around 50% to 60% of the total number of establishments in almost all districts of Prey Veng. Among the thirteen districts, “1407 Peam Ro” marked the highest position with 64.3%, while “1412 Sithor Kandal” showed the lowest position with 45.8%.

Following this industrial section, the percentage for “C. Manufacturing” indicated the second position among the industrial sections in the province (15.0%) and in all of the districts excluding “1410 Krong Prey Veng”, “1408 Pea Reang”, “1407 Peam Ro” and “1406 Peam Chor” in which the percentage for “I. Accommodation and food service activities” occupied the second rank. The district “1412 Sithor Kandal” recorded the highest rank of 32.5%, while “1407 Peam Ro” showed the lowest position with 7.2%.

The percentage for “I. Accommodation and food service activities” presenting the third position for Prey Veng (12.0%) displayed different values among the thirteen districts. The highest of 25.7% was indicated by “1406 Peam Chor” while the lowest of 5.4% was shown by “1412 Sithor Kandal”.

The percentage for “S. Other service activities” presented the fourth position in Prey Veng (6.2%). Among the districts, it recorded the highest in “1404 Kanhchriech” with 8.2%, while the lowest in “1403 Kampong Trabaek” with 5.2%.

**Fig.2-10 : Percentage of Number of Establishments by Industry**

## <Industrial Structure on Persons Engaged>

On the other hand, the picture of the industrial structure on persons engaged for the thirteen districts within Prey Veng present a rather different pattern as shown in Fig.2-11, or Annex Table D7-4. Among the seventeen groups of industry, “G. Wholesale and retail trade; etc.” recorded the largest in Prey Veng showing 48.4% and in all the districts. Within Prey Veng, the district “1409 Preah Sdach” showing 55.0% indicated the first rank, while “1410 Krong Prey Veng” presenting 31.0% marked the lowest position.

Following this industrial section, the percentage for “C. Manufacturing” indicated the second position among the industrial sections in the province (15.9%). Among the districts, it ranged from 4.8% of “1410 Krong Prey Veng” to 30.5% of “1412 Sithor Kandal”.

The percentage for “P. Education” emerged as the third section in Prey Veng (11.8%). Among the districts, it ranged from 8.9% of “1407 Peam Ro” to 21.9% of “1410 Krong Prey Veng”.

## <Industrial Structure of Annual Sales>

Fig.2-12 or Annex Table D16-3 depicts the percentage distribution of the amount of annual sales by industry. Among the seventeen groups of industry, “G. Wholesale and retail trade; etc.” recorded the largest in Prey Veng showing 48.4% and in all the districts. Among the districts, “1407 Peam Ro” recorded the first position (74.5%) while “1412 Sithor Kandal” the last (59.3%).

Following this industrial section, the percentage for “C. Manufacturing” indicated the second position among the industrial sections in the province (8.5%). Among the districts, it showed divergent values from 4.8% for “1409 Preah Sdach” to 15.6% for “1411 Kampong Leav” and “1412 Sithor Kandal”.

1) 2008 PC: 2008 Population Census. 2011 EC: 2011 Economic Census.

2) Aged 5 and over.

Observing the table, it can be recognized that about three fourths of the employed persons in the country of Cambodia, were engaged mostly in the agricultural sector as well as in the sectors of “O”, “T” and “U” in ISIC, which were not enumerated in the Census. This fact should always be kept in mind when we analyze the results of the Economic Census both for Cambodia and Prey Veng.
